Web Programiranje 1

Dokumentacija

Nikola Begović 42/17

1 Table of Contents

1 Tehnologije:

- Editor: VS Code;
- Markup: HTML5;
- Style: CSS3;
- Scripting: Javascript – ECMA Script 6;
- Library: jQuery – v3.3.1, ScrollReveal.js;
- Framework: Bootstrap – v4.1.3;
- Plugin: LoadingOverlay – MessageBox;
- Data Source: Github API, Ajax;
- Deployment: Git Version Control System with Auto-Deploy to Github Pages;

2 Funkcionalnost:

- Single Page App;

2.1.1 Main Search:

- Pri **inicijalnom učitavanju** stranice dobijamo podatke o korisnicima sa *Github API*-ja, sa podrazumevanom vrednosti **"a"**;
- ***https://api.github.com/search/users?q=a***
- Pretraga se vrši iz banera stranice, koji regularnim **izrazima kontrolise ispravan unos** podataka za pretragu, **kod pogrešnog unosa** se dobija suptilna poruka ispod polja za pretragu, **moguće su samo slovne vrednosti, space I bspace**;
- Polje je **pri učitavanju** stranice **označeno**;
- Kada se vrednosti unose u polje **na zahtev se čeka 500 milisekundi**, kao dobra praksa pri prikazivanju dinamičkog sadržaja;
- Elementi sa korisnicima pored imena imaju I rezultat poklapanja koji zavisi od aktivnosti korisnika i samog imena;
- Omogućena je **"Load More" paginacija** koja dostavlja **još** dodatnih **6** rezultata;
- **Auto-Slideshow** je omogućen u pozadini glavnog banera, funkcijom koja se izvršava u jednakim intervalima;

2.1.2 Individual User and Repositories:

- Klikom na element sa likom i imenom bilo kog korisnika, šaljemo još jedan zahtev koji nam vraća podatke o individualnom korisniku;
- ***https://api.github.com/users/<username>***
- Gde ***<username>*** predstavlja ime profila korisnika;
- Dok dobijamo podatke o korisniku **u pozadini se realizuje** još jedan zahtev koji dobavlja informacije o njegovim **repozitorijumima**;
- ***https://api.github.com/users/<username>/repos***

- Repozitorijumi zatim bivaju prikazani zajedno sa informacijama o datom korisniku, nad njima je izvršena **paginacija** koja nam dozvoljava da vidimo po 5 repozitorijuma na jednoj stranici, sa evidentiranim brojem stranice, takođe je **paginacija onemogućena** u slučaj **kada nestane sadržaja**;

2.1.3 About Author and Functions:

- Pored pristupa standardnim korisnicima **autoru** pristupamo isključivo iz navigacionog menija, dobijamo rezultate kao i za ostale korisnike;
- *https://api.github.com/users/BegovicNikola*
- Korisnički profili se **razlikuju po bojama** u zavisnosti od toga da li korisnik traži posao, **zeleni** za zainteresovane i **crveni** u odsustvu interesovanja;
- Na korisničkoj stranici se na mestu **"Load More"** tastera, sada javlja **"Back to Home"**;
- Funkcije koje obrađuju podatke o individualnim korisnicima se mogu javiti u **nekoliko varijanti**:
- Funkcije koje **prepoznaju nedostatak sadržaja** i ostavljaju poruku na klijentskoj strani "No information provided…";
- Funkcije koje čine **sadržaj čitljivijim**, to uključuje prikaz datuma u određenom formatu, skraćivanje određenih naziva itd.

2.1.4 Animation and Reveal:

- U navigacionom meniju odabirom opcije "Features" dobijaju se tehnologije i kratka objašnjenja o procesu izrade aplikacije;
- Na svim celinama su omogućene animacije i efekti kod vraćanja na vrh, 700 milisekundi ostavlja dovoljno prostora da se učita izabrani sadržaj na stranici, efekti su mešavina **jQuery ugrađenih funkcija i ScrollReveal.js biblioteke**;
- **Plugin** omogućava preuzimanje dokumentacije sa sajta i menja default popup prozore browser-a, plugin se zove **MessageBox** a deo je plugin-a LoadingOverlay;
- Uz preuzeti token aplikacija dozvoljava do 5000 zahteva na sat;

3 Opis Aplikacije:

- Github Recruit je aplikacija za brzi i olakšani pregled developera iz celog sveta. Njihovih dosadašnjih projekata i biografije. 2018 godine je procenjeno da Github ima 31 milion aktivnih korisnika što otvara velike mogućnosti za nalaženje potencijalnih zaposlenih.

4 Struktura:

- Fiksna Navigacija, Banner sa Pretragom i **2 držača prostora**;
- Prvi koji drži ceo sadržaj vraćen od strane API-ja sa elementima koji su najčešće **Bootstrap Cards**, Grid u slučaju vraćanja više korisnika i profilnu u slučaju individualnog korisnika;
- Drugi koji drži pomoćne tastere za navigaciju i **menja** ih zavisno od trenutnog prikaza **"Load More"** ili **"Back to Home"**;

5.2 About or Single User Render:
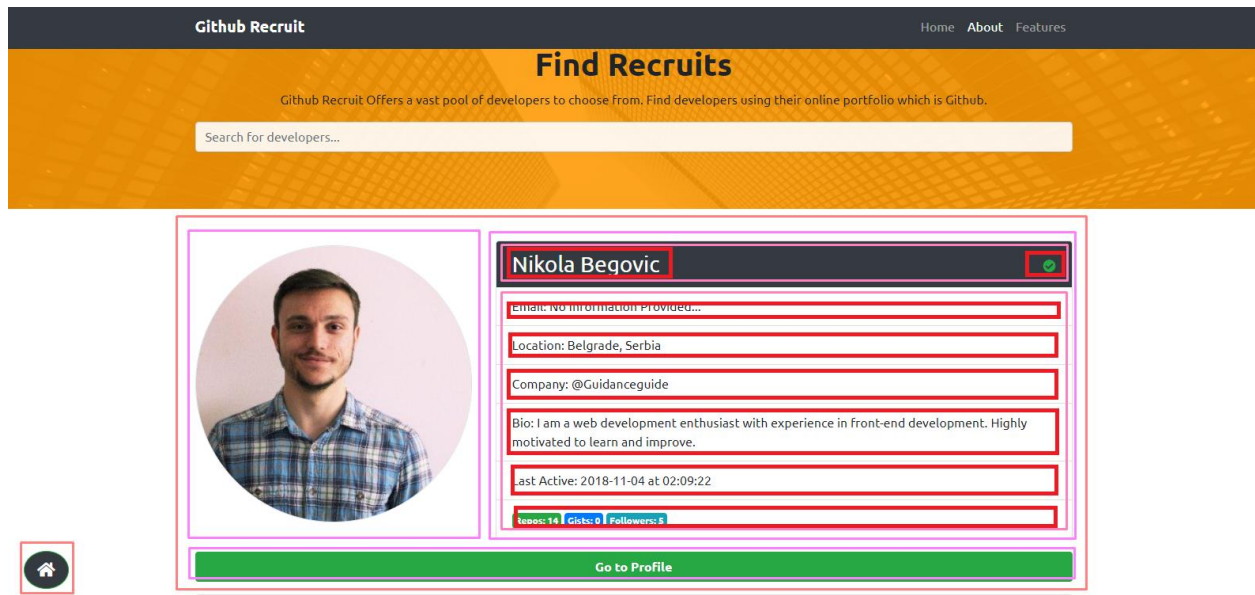

Repositories on Single User Render:
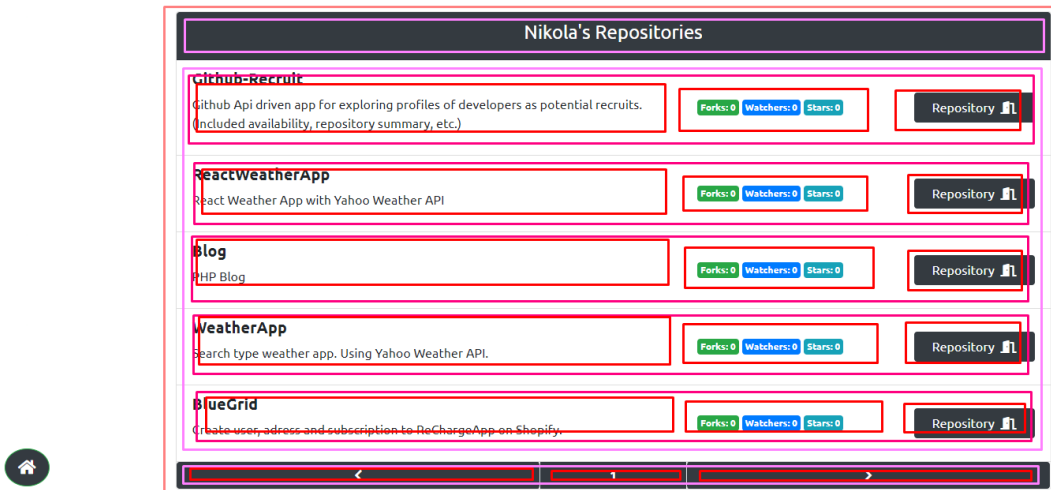

5.3 Features Render:

Github Recruit Features

Documentation

ScrollReveal.Js

```
Source URL: "https://unpkg.com/scrollreveal";
Example: ScrollReveal().reveal('#example', { delay: 500, duration: 500 });
```

ScrollReveal.js

ScrollReveal is a JavaScript library for easily animating elements as they enter/leave the viewport. It was designed to be robust and flexible, but hopefully you'll be surprised below at how easy it is to pick up.

Github API

```
Getting Data: GET /search/users
Endpoint: https://api.github.com/search/users?q=user
```

Github API

```
Getting Data: GET /search/users
Endpoint: https://api.github.com/search/users?q=user
```

GitHub

GitHub Inc. is a web-based hosting service for version control using Git. It is mostly used for computer code. It offers all of the distributed version control and source code management (SCM) functionality of Git as well as adding its own features. It provides access control and several collaboration features such as bug tracking, feature requests, task management, and wikis for every project.
Using the API:
By default, all requests to https://api.github.com receive the v3 version of the REST API.

Git - Version Control

```
Initiate: git init
Commit: git commit -m "Example Commit"
```

Git is a free and open source distributed version control system designed to handle everything from small to very large projects with speed and efficiency. Git is easy to learn and has a tiny footprint with lightning fast performance.

5.4 Features Render:

ECMA Script 6

```
Constants & Block Scope Variables: const / let
Arrow Functions: () => { ...code }
```

ES6

ECMAScript or ES is a trademarked scripting-language specification standardized by Ecma International. It was created to standardize JavaScript, so as to foster multiple independent implementations. JavaScript has remained the best-known implementation of ECMAScript. ECMAScript is commonly used for client-side scripting, and it is increasingly being used for writing applications and services using Node.js.

jQuery - v3.3.1

```
CDN: "https://code.jquery.com/jquery-3.3.1.min.js";
Example: $('example').click(function{ ...code });
```

jQuery is a fast, small, and feature-rich JavaScript library. It makes things like HTML document traversal and manipulation, event handling, animation, and Ajax much simpler with an easy-to-use API that works across a multitude of browsers. With a combination of versatility and extensibility, jQuery has changed the way that millions of people write JavaScript.

Bootstrap - v4.1.3

```
CDN Js: "https://stackpath.bootstrapcdn.com/bootstrap/4.1.3/js/bootstrap.min.js";
CDN Css: "https://maxcdn.bootstrapcdn.com/bootstrap/4.0.0/css/bootstrap.min.css";
```

Build responsive, mobile-first projects on the web with the world's most popular front-end component library. **Bootstrap** is an open source toolkit for developing with HTML, CSS, and JS. Quickly prototype your ideas or build your entire app with our Sass variables and mixins, responsive grid system, extensive prebuilt components, and powerful plugins built on jQuery.

6 SEO

6.1 Sitemap:

```xml

8 Custom Styling:

```css
/* Banner Styling -> Start */
body{
    font-family: 'Ubuntu', sans-serif;
}
#banner_holder{
    height: 320px;
    width: 100%;
}
#banner_images{
    background-image: url('../images/banner1.jpg');
    background-size: cover;
    background-attachment: fixed;
    background-position: top;
    height: 320px;
    width: 100%;
}
#banner_overlay{
    background-color: rgba(255, 153, 0, 0.88);
    height: 320px;
    width: 100%;
}
#search{
    background-color: rgba(255, 255, 255, 0.9);
}
#warning{
    color: transparent;
}
#logo, #navigate_home, #navigate_about, #navigate_features, #next, #back{
    cursor: pointer;
}
/* Banner Styling -> End */
```

```css
33    /* Content Grid Styling -> Start */
34    .content_item{
35      cursor: pointer;
36    }
37    .content_item img{
38      -moz-transition: all .5s ease-in-out;
39      -webkit-transition: all .5s ease-in-out;
40      transition: all .5s ease-in-out;
41    }
42    .content_item:hover img{
43      -moz-transform: scale(1.1);
44      -webkit-transform: scale(1.1);
45      transform: scale(1.1);
46    }
47    .card_img_holder{
48      overflow: hidden;
49    }
50    .card-body span{
51      font-size: 1.5em;
52    }
53    /* Content Grid Styling -> End */
```

```css
55    /* Buttons Styling -> Start */
56    #go_home, #load_more{
57      position: fixed;
58      bottom: 20px;
59      left: 20px;
60      z-index: 999;
61    }
62    /* Back To Home Animation */
63    @-webkit-keyframes pulse{
64      0% { transform: scale(1); }
65      25% { transform: scale(1.2); }
66      50% { transform: scale(1); }
67      75% { transform: scale(0.8); }
68      100% { transform: scale(1); }
69    }
70    @keyframes pulse{
71      0% { transform: scale(1); }
72      25% { transform: scale(1.2); }
73      50% { transform: scale(1); }
74      75% { transform: scale(0.8); }
75      100% { transform: scale(1); }
76    }
77    #go_home:hover .fa-home{
78      -webkit-animation: pulse 2s infinite linear;
79      animation: pulse 2s infinite linear;
80    }
81    /* Load More Users Animation */
82    #load_more:hover .fa-arrow-down{
83      -webkit-animation: pulse 2s infinite linear;
84      animation: pulse 2s infinite linear;
85    }
86    /* Buttons Styling -> End */
```

9   Scripting:

(Prve 3 slike su promenjene zbog uslova, jQuery u Vanilla Javascript -> Nalaze se u komentarima da ne kvare uniformnost jQuery ES6)

```javascript
1   $(document).ready(() => { // window.onload = () => {
2
3       // Going to Home Page
4       const navigate_home = () => {
5
6           $('html, body').animate({ scrollTop: 0 }, "slow");
7           ScrollReveal().clean('#content');
8           ScrollReveal().reveal('#content', { delay: 700, duration: 700 });
9
10          render_users(user);
11          $('.nav-item').removeClass('active');
12          $('#navigate_home').addClass('active');
13          /*
14
15          document.querySelectorAll('.nav-item').forEach((e) => {
16              e.classList.remove('active');
17          });
18          return_home.classList.add('active');
19
20          */
21      }
22      $('#navigate_home').click(navigate_home);
23      $('#logo').click(navigate_home);
24      /*
25
26      let return_home = document.getElementById('navigate_home');
27      let logo = document.getElementById('logo');
28
29      return_home.addEventListener('click', navigate_home);
30      logo.addEventListener('click', navigate_home);
31
32      */
```

```javascript
34      // Going to About Page
35      /*
36      let return_about = document.getElementById('navigate_about');
37      return_about.addEventListener('click', function(){
38      */
39      $('#navigate_about').click(function(){
40
41          $('html, body').animate({ scrollTop: 0 }, "slow");
42          ScrollReveal().clean('#content');
43          ScrollReveal().reveal('#content', { delay: 700, duration: 700 });
44
45          const my_name = 'BegovicNikola';
46          render_user(my_name);
47          $('.nav-item').removeClass('active');
48          $(this).addClass('active');
49          /*
50          document.querySelectorAll('.nav-item').forEach((e) => {
51              e.classList.remove('active');
52          });
53          return_about.classList.add('active');
54          */
55      });
56      // Going to Features Page
57      /*
58      let return_features = document.getElementById('navigate_about');
59      return_features.addEventListener('click', function(){
60      */
61      $('#navigate_features').click(function(){
62
63          $('html, body').animate({ scrollTop: 0 }, "slow");
64          ScrollReveal().clean('#content');
65          ScrollReveal().reveal('#content', { delay: 700, duration: 700 });
66
67          render_features();
68          $('.nav-item').removeClass('active');
69          $(this).addClass('active');
70          /*
71          document.querySelectorAll('.nav-item').forEach((e) => {
72              e.classList.remove('active');
73          });
74          return_features.classList.add('active');         You, a few seconds ago • Uncommitted changes
75          */
76      });
77
78      // Background auto-slideshow
79      // let banner_holder = document.getElementById('banner_images');
80      let banner_holder = $('#banner_images');
81      const banner_images = ['images/banner1.jpg', 'images/banner3.jpg','images/banner2.jpg', 'images/banner3.jpg'];
82      let curr = 1;
```

```javascript
53        // Focus on Search Field
54        // document.getElementById('search').focus();
55        $('#search').focus();
56
57        // Users Variables
58        let user = 'a';
59        let page = 1;
60        let per_page = 6;
61
62        // Check for Valid Search Input
63        const srcRegEx = /^[a-z\s\b]+$/i;
64        // let srcInput = document.getElementById('search');
65        let srcInput = $('#search');
66
67        // Ajax on Page Load
68        ScrollReveal().reveal('#content', { delay: 700, duration: 700 });
69        render_users(user);
70
71        // Search for Users Function
72        let timeout = null;
73        (function search_users(){
74            // srcInput.addEventListener('keyup', e => {
75            srcInput.on('keyup', e => {

   #d0d0d0}
```
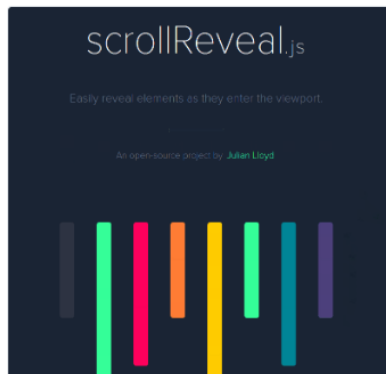

10 Tools and Workflow:

10.1 ScrollReveal.js:

ScrollReveal.Js

```
Source URL: "https://unpkg.com/scrollreveal";
Example: ScrollReveal().reveal('#example', { delay: 500, duration: 500 });
```

ScrollReveal is a JavaScript library for easily animating elements as they enter/leave the viewport. It was designed to be robust and flexible, but hopefully you'll be surprised below at how easy it is to pick up.

10.2 Github API:

Github API

```
Getting Data: GET /search/users
Endpoint: https://api.github.com/search/users?q=user
```

GitHub Inc. is a web-based hosting service for version control using Git. It is mostly used for computer code. It offers all of the distributed version control and source code management (SCM) functionality of Git as well as adding its own features. It provides access control and several collaboration features such as bug tracking, feature requests, task management, and wikis for every project.
Using the API:
By default, all requests to `https://api.github.com` receive the v3 version of the REST API.

10.3 Git Version Control:

Git - Version Control

```
Initiate: git init
Commit: git commit -m "Example Commit"
```

Git is a free and open source distributed version control system designed to handle everything from small to very large projects with speed and efficiency. Git is easy to learn and has a tiny footprint with lightning fast performance.

10.4 ECMA Script 6:

ECMA Script 6

```
Constants & Block Scope Variables: const / let
Arrow Functions: () => { ...code }
```

ECMAScript or ES is a trademarked scripting-language specification standardized by Ecma International. It was created to standardize JavaScript, so as to foster multiple independent implementations. JavaScript has remained the best-known implementation of ECMAScript. ECMAScript is commonly used for client-side scripting, and it is increasingly being used for writing applications and services using Node.js.

10.5 jQuery – v3.3.1:

jQuery - v3.3.1

```
CDN: "https://code.jquery.com/jquery-3.3.1.min.js";
Example: $('example').click(function{ ...code });
```

jQuery is a fast, small, and feature-rich JavaScript library. It makes things like HTML document traversal and manipulation, event handling, animation, and Ajax much simpler with an easy-to-use API that works across a multitude of browsers. With a combination of versatility and extensibility, jQuery has changed the way that millions of people write JavaScript.

10.6 Bootstrap – v4.1.3:

Bootstrap - v4.1.3

```
CDN Js: "https://stackpath.bootstrapcdn.com/bootstrap/4.1.3/js/bootstrap.min.js";
CDN Css: "https://maxcdn.bootstrapcdn.com/bootstrap/4.0.0/css/bootstrap.min.css";
```

Build responsive, mobile-first projects on the web with the world's most popular front-end component library. **Bootstrap** is an open source toolkit for developing with HTML, CSS, and JS. Quickly prototype your ideas or build your entire app with our Sass variables and mixins, responsive grid system, extensive prebuilt components, and powerful plugins built on jQuery.
